

## KWAZAR GUIDE TO FENCING STAPLES

# Staples Information

## 1 Fuel Cell Powered Staple Guns

There are guns that take 3.15mm (same as 3.1 width staples.)

There are guns that take 4.0mm width staples.

Virtually all 3.15 guns are produced by the same manufacturer and then branded with minor differences.

Some guns (DeWalt) only take proprietary staples.

The staples themselves can be smooth, knurled, or barbed. They come held together by tape.

**Most popular are the barbed even though tests show that the knurled are as effective.**

## 2 Loose, manually fixed fence staples

Nearly all are barbed, 4.0mm width with either 40, 45, or 50mm length.

Generally come in tubs of 5kg, 10kg and 20kg

## Why Choose Us

Easy ordering, great service and best prices.
