

ALKALINE

For use with liquids with a Ph level 7-14.

Always read and comply with the manufacturers instructions supplied with the sprayer.

Venus Super HD alka line pressure sprayer from the Heavy Duty series with increased chemical resistance can be used with mixtures based on alkaline agents, ketones (i.e. acetone, MEK) and alcohols (i.e., ethanol, methanol, isopropa- nol) and DOT-4 type brake fluids. It can be used for disinfection, cleaning, in the food industry, in workshops etc. The device is fitted with EPDM seals.

The sprayer is not intended for contact with mineral oils and greases, gasoline, aliphatic and aromatic (e.g. toluene, xylene) and chlorinated hydrocarbons, concentrated organic and inorganic acids, fats, NITRO solvent. The availability of various chemical agents on the market requires the user to test the sprayer with the target agent. KWAZAR CORPORATION Sp. z o.o. does not guarantee the universality of the device.
